High Performance Speakers

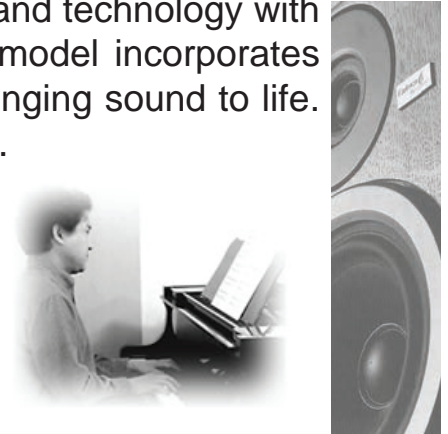

“ARTIST SERIES” Model CZ302ES Speaker

Micropure is pleased to introduce the latest in speaker design and technology with the CZ302ES model from the “Artist Series”. The CZ302ES model incorporates patented features that provide enhanced quality and clarity bringing sound to life. We don't want you to only hear it, we want you to experience it.

CZ302ES

- *4" Full-Range Driver*
- *Murata Spherical Super Tweeter*
- *Handcrafted Mahogany Enclosure*
- *Patented with Micropure Technology*
- *Ultra-High Sound Quality and Clarity*

Fujiken, Inc., is a world-leader in the design and manufacturing of music boxes and instruments.

The CZ302ES speaker box is individually handcrafted by experts using only high-quality maple and mahogany wood. The detailed workmanship and patented design creates an enclosure that enhances noise distribution and outputs an incredible crystal clear sound.

Regards,
Micropure

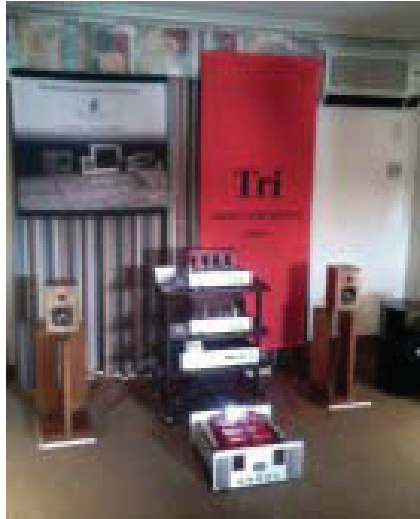

CES Show Introduction

Micropure introduced the CZ302ES in January 2006 at the CES Show in Las Vegas Nevada, USA.

The CZ302ES is the latest edition to the "Artist Series" line and was introduced to global experts during the famous CES show. The crisp clear sound quality was heard from all areas of the show. Show attendees and experts gathered around us enjoying the beautiful sound that came from the CZ302ES.

Music lovers and technical pioneers were amazed by the rich and pure sound that transpired from these speakers. The world has heard a fresh sound that is not only heard but felt.

Now the world can enjoy a new revolution in sound technology.

Handcrafted Construction

The CZ302ES cabinets are constructed by expert craftsman from Fujiken, Inc. a world-leader in the manufacturing of music boxes and instruments.

The cabinet is handcrafted from the finest wood available. The front maple wall combined with the solid mahogany side walls provides unbelievable sound quality and clarity.

Testimonial

Hello Mr. Fukuda

It was indeed a pleasure meeting you at CES and hearing your wonderful new speaker.

I'll bet that you haven't heard of Pastoral Symphony or their Micropure technique of building high resolution monitors. That's one of the best things about CES, you will see and hear new things. The Micropure technique was explained to me by Sakuji Fukuda, their chief designer. The essence is that they try and keep cabinet mass and crossover elements to a minimum. They showed a new mini-monitor at CES that was amazingly transparent and possessed a marvelous musical and acoustic ease. Though they were quite small, I was unprepared for just how light they were. Very light! I am very much hoping to have the chance to review this promising model soon.

---Valued customer

Technical Specifications

Micropure products are designed, engineered and tested to exceed industry standards. Our passion for sound and clarity ensures your experience with the CZ302ES will be memorable.

Technical Data

- IMP ----- 4Ω
- POWER ----- 60W RMS 100W (PEAK)
